IMAGEQUEST

Access Millions of Images & Videos Curated to Captivate Your Class

ImageQuest helps teachers quickly find engaging visual content to bring lessons to life. And with more than 3 million images and videos available, students can explore safe, age-appropriate resources for any subject, topic, and class. The platform includes content from over 60 leading collections, such as Getty Images, the Natural History Museum, Dorling Kindersley, and more. It offers the best and broadest selection of curriculum-relevant imagery, videos, and clip art materials, and more - all rights-cleared for educational, non-commercial use.

Save and Organise Media

Set up a My Britannica account to easily save and share images and videos, accessible from any device or location. Educators and students can view their favourite media and organise images and videos into albums. The notes section also enables simple communication between educators and students, enhancing the digital learning experience.

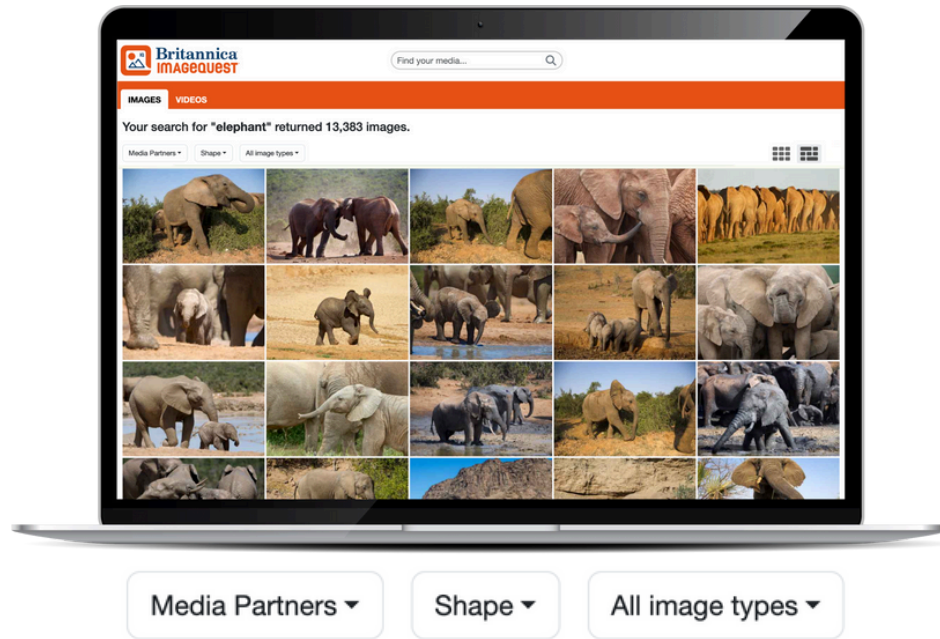

How can teachers use My Media?

My Media provides the perfect area for teachers to collect and organise all relevant images and videos for a specific unit of work. Use the notes section for forward planning and share albums with students or colleagues. Students are able to view the album without having a My Britannica account.
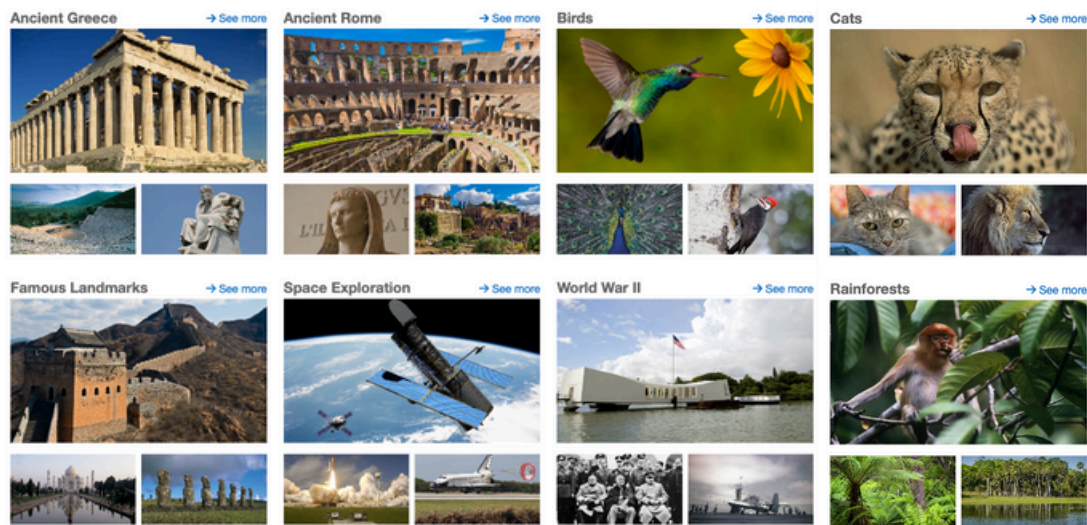

How can students use My Media?

Students can keep track of the content they have found as they research by organising it into an album. They can use the notes section to write summaries of key points and other notes as they research.

Search and Filter Results

Whether you're looking for images from specific media sources, need a particular orientation, or require clip art, we've got it all covered. Our high-quality mutlimedia content is organised by topic to save you time, and can be quickly filtered to help you find the perfect visual resource.

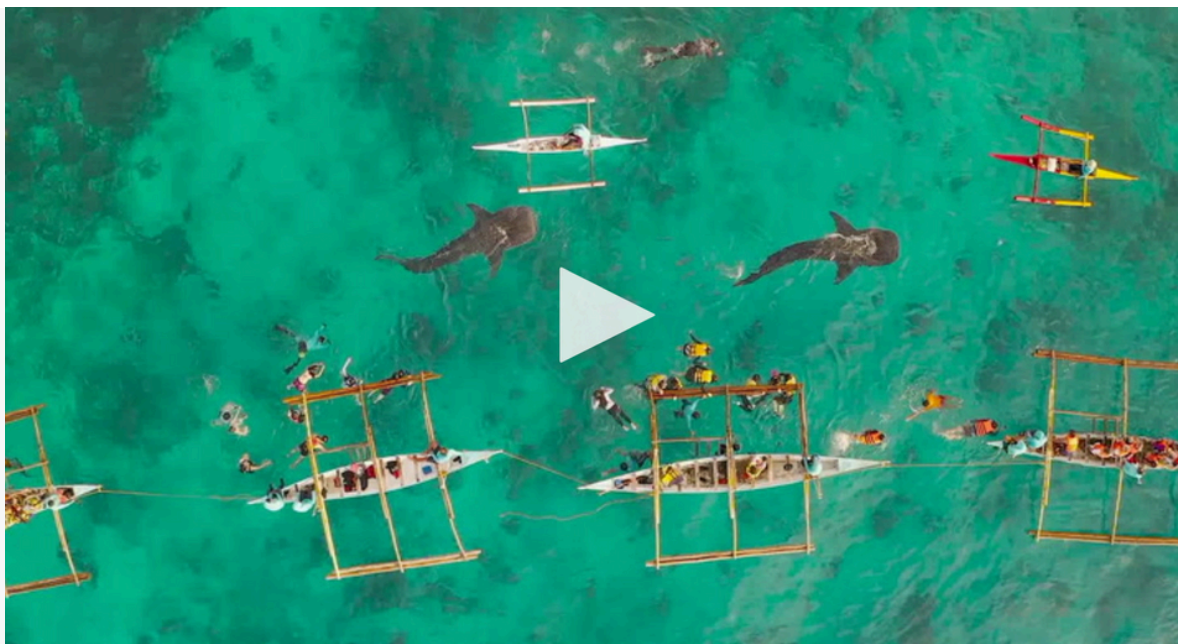

Browse Curated Galleries

On the **ImageQuest** home page, you'll find carefully curated galleries of images and videos to explore! Browse the best-quality images and videos from our most popular searches to quickly find the content you're looking for.

Share, Cite, and Download

Support academic integrity and develop research skills with clear copyright citations and source information provided with every image and video.

Aerial tracking shot of locals feeding a juvenile Whale shark (Rhincodon typus) and swimming past a crowd of tourists, Oslob, Philippines, May.
