

Task: Human Impact on Ocean Life

Create a chart illustrating the **human impact on ocean life**.

Tip: You can find and read an article about pollution in the Britannica Library resource pack "Ocean Conservation".

1. People dump rubbish into the water.

2. Water bacteria and organisms can not break down the materials.

4. There are many types of water pollution, oils, chemicals and sediment are some examples.

3. Rubbish builds up in great quantities.
